

Sam Reid, Ph.D.

University of Colorado Boulder

# PhET Interactive Simulations

- Founded in 2002 by Boulder's Nobel Prize Physicist Carl Wieman
- 120+ interactive simulations in Flash, Flex, Java, **JavaScript**
- **Free and Open Source, no login/account required to use**
- 200,000,000 launches
- Math, Physics, Biology, Earth Science, Chemistry, etc.
- Highly interactive, gamelike simulations
- Student = Scientist

# Sim Demos

- Energy Skate Park: Basics
  - Open-ended, flexible, fun
  - <http://phet.colorado.edu/en/simulation/energy-skate-park-basics>
- Molecule Shapes
  - Visually engaging, scientifically accurate
  - [http://phet.colorado.edu/sims/html/molecule-shapes/latest/molecule-shapes\\_en.html](http://phet.colorado.edu/sims/html/molecule-shapes/latest/molecule-shapes_en.html)
- Build an Atom
  - Games
  - [http://phet.colorado.edu/sims/html/build-an-atom/latest/build-an-atom\\_en.html](http://phet.colorado.edu/sims/html/build-an-atom/latest/build-an-atom_en.html)
- Bending Light
  - [http://www.colorado.edu/physics/phet/dev/html/bending-light/1.0.0-dev.8/bending-light\\_en.html](http://www.colorado.edu/physics/phet/dev/html/bending-light/1.0.0-dev.8/bending-light_en.html)

# Process

- Idea (from teachers, community, etc.)
- Design + Implement
- Student interviews
- Code review
- Thorough QA Testing on 18 platforms
- Publish
- Maintenance

# Implementation

- The simulation
- Model support: Axon
- View support
  - Scene graph, input events, rendering: Scenery
  - User interface components (checkboxes, sliders, etc): Sun
  - Custom interface (water faucets, gauges): Scenery-phet
- Framework: Joist
- Build tools: Chipper
  - Builds a single HTML file (inlines all images/audio)
    - One http request
    - Easy for teachers to download and run, no server necessary

# The Scene Graph: Scenery

- Configurable hit areas for touch devices
  - [http://phet.colorado.edu/sims/html/beers-law-lab/latest/beers-law-lab\\_en.html?showPointerAreas](http://phet.colorado.edu/sims/html/beers-law-lab/latest/beers-law-lab_en.html?showPointerAreas)
- Render with SVG/Canvas/WebGL (partial support)
  - [http://localhost:8080/acid-base-solutions/acid-base-solutions\\_en.html?ea&brand=phet&rootRenderer=canvas&screens=1](http://localhost:8080/acid-base-solutions/acid-base-solutions_en.html?ea&brand=phet&rootRenderer=canvas&screens=1)  
`var node = new ProtractorNode({renderer: 'canvas'});`
- Excellent performance all the way back to iPad2
- Fine control over the UI presentation on every platform
- Fuzz testing: [http://localhost:8080/acid-base-solutions/acid-base-solutions\\_en.html?fuzzMouse](http://localhost:8080/acid-base-solutions/acid-base-solutions_en.html?fuzzMouse)
- Screen capture: [http://localhost:8080/wave-on-a-string/wave-on-a-string\\_en.html?ea&brand=phet&screenshot](http://localhost:8080/wave-on-a-string/wave-on-a-string_en.html?ea&brand=phet&screenshot)

# Internationalization

- Balancing Act: Arabic:
  - [http://localhost:8080/balancing-act/balancing-act\\_en.html?ea&brand=phet&locale=ar](http://localhost:8080/balancing-act/balancing-act_en.html?ea&brand=phet&locale=ar)
- Under Pressure: Japanese:
  - [http://localhost:8080/under-pressure/under-pressure\\_en.html?ea&brand=phet&locale=ja](http://localhost:8080/under-pressure/under-pressure_en.html?ea&brand=phet&locale=ja)
- Build an Area: Double
  - [http://localhost:8080/area-builder/area-builder\\_en.html?ea&brand=phet&stringTest=double](http://localhost:8080/area-builder/area-builder_en.html?ea&brand=phet&stringTest=double)
- String test:
  - [http://localhost:8080/acid-base-solutions/acid-base-solutions\\_en.html?stringTest=Thanks Quick Left!](http://localhost:8080/acid-base-solutions/acid-base-solutions_en.html?stringTest=Thanks Quick Left!)

# Accessibility

- <http://phet.colorado.edu/en/about/accessibility>
- Forces and Motion: Basics
  - [http://www.colorado.edu/physics/phet/dev/html/forces-and-motion-basics/1.1.5-dev.4/forces-and-motion-basics\\_en.html?screens=1](http://www.colorado.edu/physics/phet/dev/html/forces-and-motion-basics/1.1.5-dev.4/forces-and-motion-basics_en.html?screens=1)
- Faraday's Law
  - [http://www.colorado.edu/physics/phet/dev/html/faradays-law/1.0.1-sonification.8/faradays-law\\_en.html](http://www.colorado.edu/physics/phet/dev/html/faradays-law/1.0.1-sonification.8/faradays-law_en.html)

# Interoperability

- Beaker sim
- Remove controls
  - [http://localhost/beaker\\_en.html?ea&together.values=%7B"beaker.beakerScreen.soluteSelector.visible":false](http://localhost/beaker_en.html?ea&together.values=%7B%22beaker.beakerScreen.soluteSelector.visible%22%3Afalse)
- Change layout
  - **"beaker.beakerScreen.soluteSelector.rotation":1.58**
- Mirror
- Chart
- Data

# RequireJS plugins

```
// modules
var inherit = require( 'PHET_CORE/inherit' );
var PropertySet = require( 'AXON/PropertySet' );
var ObservableArray = require( 'AXON/ObservableArray' );

// strings
var airString = require( 'string!BENDING_LIGHT/air' );
var diamondString = require( 'string!BENDING_LIGHT/diamond' );

// images
var image = require( 'image!BENDING_LIGHT/laser.png' );

// audio
var audio = require( 'audio!BENDING_LIGHT/powerup' );

// mipmaps
var protractor = require( 'mipmap!BENDING_LIGHT/protractor.png' );
```

# Example Sim – implementation details

- [http://localhost:8080/example-sim/example-sim\\_en.html?ea&brand=phet](http://localhost:8080/example-sim/example-sim_en.html?ea&brand=phet)
- Code examples in IDEA
